Outdoor Cabinet Liquid Cooling Energy Storage System

Epoch-S125/261-L is new outdoor cabinet liquid cooling energy storage system developed by LEOCH, which integrates battery energy storage units, intelligent PCS, battery management system, liquid cooling system, fire protection system and energy management system. It adopts AC-DC integrated design, three-level topological structure and the most advanced high-efficiency energy storage integrated technology in the market, it has the characteristics of high charging and discharging and thermal management efficiency, multiple safety designs and small floor space. It can be applied to peak shaving and valley filling, emergency power backup, demand control, microgrids and more severe application environment.

Extreme Temperature Control

Precise liquid cooling temperature control, cell temperature difference $\leq 1^{\circ}\text{C}$, system temperature difference $\leq 3^{\circ}\text{C}$. The system has higher efficiency and longer service life.

Safe and Reliable

Multiple fire protection design, cell level temperature detection+PACK level+cabinet level perfluorohexanone fire protection+water fire protection

Modular Design

More flexible configuration, multiple parallel connections, fast response, and ensuring continuous uninterrupted power supply for critical loads

Intelligent Operation and Maintenance

The entire network's energy storage is visible and manageable, improving system reliability, stability, operation and maintenance efficiency, and optimizing system performance
