#### Discharge Performance at 25°C

### Temperature effects on capacity at 1C

#### Cautions

- 1. Do NOT short circuit, crush or disassemble.
- 2. Do NOT heat or incinerate.
- 3. Do NOT immerse in any liquid.
- 4. Store at 50% capacity. Recharge every 6 months. The storage area should be clean, cool, dry and ventilated
- 5. Disconnect charging source prior to connecting or disconnecting battery terminals.
- 6. Do NOT dispose of batteries in a fire as they can explode
- 7. Do NOT open, alter, or mutilate batteries. Released electrolyte is harmful to skin and eyes. It may be toxic. 8. Do NOT mix different types and brands of lithium-ion batteries.
- 9. Do NOT dispose in trash, follow local regulations and manufacturer's instruction.
- 10. See installation instructions before connecting to the supply.
- 11. The battery cabinet receives power from more than one source. Disconnection of all DC sources is required to De-energize this unit before installing or servicing. Wait 5 minutes before opening the unit.
- 12.Do NOT install on or over combustible surfaces
- 13. Refer to manual before servicing
- 14.Do NOT touch bare terminals.
